Motivated and detail-oriented Software Developer with hands-on experience in developing desktop and web applications. Passionate about building efficient software solutions and contributing to collaborative projects that solve real-world problems and enhance user experience.

## WORK EXPERIENCE

### Computer Instructor

Research Gate, Pakistan

*04/2024 – 12/2024*

*Achievements/Tasks*

- Design practical projects and activities to enhance hands-on learning, teaching programming languages and computer basics to students of various level.
- Helped students successfully develop their first real-world applications. Improved class performance and inspired several students to pursue tech careers.

### Administrator & Computer Instructor

Faran Public School Larkana

*08/2019 – 11/2021*

*Achievements/Tasks*

- Successfully led school-wide digital initiatives, increasing overall computer literacy, streamlined lab operations for smoother classes and improved student learning outcomes. Organized training workshops and supervised academic planning for IT courses

## PROJECTS

### Accounts Master Software Solution

- The software improves accuracy, reduces manual workload, and speeds up accounting processes. It is ideal for small and medium-sized businesses looking to streamline their operations.
- Accounts Master is a powerful accounting software solution designed to handle sales, purchases, expenses, and customer management with ease. It offers automatic report generation for profit and loss statements, balance sheets, and invoices.

### Pharmacy Management System

- The Pharmacy Management System (PMS) is a software designed to help pharmacies manage their daily tasks. It helps keep track of medicine inventory, sales, and prescriptions. The system makes it easier to manage the pharmacy, reduce mistakes, and provide better service to customers. It's simple to use and helps staff stay organized and efficient.

## EDUCATION

### Bachelor's in Computer Science - (BSCS)

From University Of Sindh

*01/2022 - (in Progress)*

*Capstone Project: Body Nest (GYM Software)*

- The Body Nest is a software designed to help gyms manage their daily operations effectively. It supports functionalities such as member management, fee tracking, and monthly fitness reports.

## TECHNICAL SKILLS

Programming Languages

*C++, C#, Java*

Web Development

*HTML, CSS, JavaScript, MERN stack (MongoDB, Express, React, Node.js)*

Database Management

*MS SQL Server*

## ADDITIONAL SKILLS

UI/UX Design · MS Office · Problem-Solving · Teamwork · Multitasking · Networking · Project Management Tools

## CERTIFICATES

- Java Programming Language
  Research Gate, Pakistan | December 2023
